

## EDUCATIONAL STUDIES, EARLY CHILDHOOD EDUCATION GUIDED PATHWAY

### Education Meta-Major

Earn an Associate of Applied Science in early care & education from York Technical College, and transfer to Winthrop University to earn your Bachelor of Science in educational studies, early childhood education. The educational studies program prepares undergraduate students to be effective community leaders and educators. With a focus on culturally responsive practices, the program provides opportunities for self-reflection, communication, an asset-focused mindset, and examination of societal and cultural factors that impact student achievement, the role of literacy in learner development and methods to differentiate instruction to engage and challenge diverse learners. The educational studies major does not result in teacher certification and instead provides a gateway to certification at the graduate level.
